

BUG 5 - Sign up - Not suitable message after trying to sign up with incomplete data

Repro steps:

1. Open a Browser
2. Navigate to Store application by pasting following URL into address bar:
<https://www.demoblaze.com/index.html>
3. Click on "Sign up" option from navigation bar
4. Enter username into "Username" field and do not enter password
5. Click on "Sign up" button

Expected: : User gets appropriate message about Password not being populated.

Issue (Actual): User gets the message that both Username and Password are not populated, even though username was populated.

Note: Analog to this issue, same thing happens when password is populated and username not.

Priority: 3

Severity: 3-Medium
