BUG 1 - Log in - Not suitable message after trying to log in with incomplete data

Repro steps:

1. Open a Browser
2. Navigate to Store application by pasting following URL into address bar:
https://www.demoblaze.com/index.html
3. Click on Log in option from navigation bar
4. Enter username (e.g. "testor") but do not enter password
5. Click on "Log in" button

Expected: User gets appropriate message about Password not being populated.
Issue (Actual): User gets the message that both Username and Password are not populated, even though username was populated.

Priority: 3

Severity: 3-Medium
